### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Mollon on 1/10/08.

2. The application has been amended as follows:

#### **Claim 13**

"(Currently amended) Software for distribution of digital rights management (DRM) encoded content items over a digital network between a client and a target server, wherein said target server is capable of providing said DRM encoded content item in a plurality of respective DRM methods, said software embodied on a computer readable medium and, when executed by said client, operable to perform the steps comprising:"

**has been changed to**

--(Currently amended) Software for distribution of digital rights management (DRM) encoded content items over a digital network between a client and a target server, wherein said target server is capable of providing said DRM encoded content item in a plurality of respective DRM methods, said software embodied on a computer readable storage medium and, when executed by said client, operable to perform steps comprising:--

**Claims 8-12 and 17-21 are cancelled.**

***Allowable Subject Matter***

3. Claims 1-7 and 13-16 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method for distributing protected (e.g. licensed) digital content, for making content items available via multiple digital rights management methods and for selecting a compatible digital rights management (DRM) method for distributing content items from a target server to a client. The invention has the advantage of adapting file delivery to a DRM method preferred by a user, thereby avoiding the necessity of loading a multiple of DRM software applications on the user's computer. Each independent claim (claims 1 and 13) identifies unique feature of the client sending an offer message to the target server containing a list of at least one supported DRM method; the target server sending an answer message to the client containing a corresponding answer list: indicating whether each DRM method listed in the offer message is supported by the target server and providing a respective network address of a DRM license server for each supported DRM method. The closest prior arts fail to anticipate or render the above limitations obvious.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
